## Organisation Overview

### Organisation:

JingoTech Provider(Fiction)

### Background:

JingoTech Provider is a South African technology company in Cape Town. Formerly under the name NeinvalliZone, the business excelled in computer hardware, repairs and custom-built computers. In 2021, ownership was transferred to Jingo, rebranding to JingoTech Provider.

The long-term vision is to expand beyond the Western Cape and establish branches across South Africa.

### Website mission:

To make quality technology affordable and accessible by providing reliable computer products, superb technical services and customer support. We accomplish this by providing the customer an avenue to enquire about what help they require whether its questions on what pc to get, which pc they're looking for or if they require a technical fix, we will cover the user.

### Website Vision:

To become one of South Africa's most trusted independent technology retailers and service providers by delivering innovative solutions and expanding nationally. This will be done through word of mouth in our website as more people will drop by our store in Cape Town to deal with their PC needs.

### Target Audience:

- Students
- Clients in Business
- Content Creators
- Gamers
- Customers with limited technical knowledge

## Website Goals & Objectives:

- Awareness of JingoTech brand.
- Showcases JingoTech services and products.
- Customers book repairs online.
- Allow customers to request quotations.
- Display sales and specials.
- Builds trust with daily customers with reviews.
- Improve communication.
- Provide educational articles and troubleshooting guides.

## KPI

| KPI                              | Target        |
|----------------------------------|---------------|
| Quote Requests                   | 80+ per month |
| Monthly Visitors                 | 1,500–2,000   |
| Customer Satisfaction            | 90%+          |
| Website Uptime                   | 99.9%         |
| Mobile Users Successfully Served | 90%           |

## Current Website Analysis

JingoTech Provider currently operates through walk-in customers, social media platforms such as Facebook, Instagram and WhatsApp. We plan to expand as the months pass on and grow the brand further throughout the net.

### Strengths

- Active social media presence
- Good local reputation
- Returning customers

### Weaknesses

- No online booking system
- Difficult for customers outside Cape Town to track
- No central location for information

# Proposed Website Features

## Homepage

Needs:

- Banner
- Featured Products
- Quick booking button

## Products

Needs:

- Gaming PCs
- Office PCs
- Components
- Networking Equipment

## Services

Needs:

- Computer Repairs
- Virus Removal
- Laptop Upgrades
- Custom PC Builds
- Maintenance

## Online Booking

Needs:

- Choose repair type
- Preferred date
- Preferred time

## About Us

Needs:

- Company history
- Mission
- Vision
- Meet the team

## Contact Page

- Google Maps
- Contact Form
- Phone Number
- Email
- Business Hours

## FAQ

- Answering common questions already asked.

## Blog

- Showing articles that help with topics related to this business
  - > E.g) Choosing the right PC components

## Design & User Experience

### Design Philosophy:

Website will combine a sleek and professional layout with bold visual factors that pushes JingoTech Provider's identity the interface will contain its personality and ideals.

### Colour Palette:

#### *Primary:*

##### *Deep Navy*

- Technological feel
- Trust feeling

#### *Secondary:*

##### *Electric Blue*

- Shows Innovation

#### *Accent:*

##### *Sunshine yellow*

- A call to action

#### *Neutral:*

- White
- Light Grey
- Dark Charcoal

### Typography:

#### *Headings*

##### **Poppins Bold**

- A modern look
- A readable heading
- A friendly look

#### *Body*

##### **Inter**

- Readable to all
- Great od Mobile/Desktop

#### *Buttons*

##### **Poppins SemiBold**

## Layout

The site will have:

- A large banner to be an eye catcher for users
- Card-based service layout, can find apps
- Large spacing.
- Rounded cards.
- Sticky navigation.
- Responsive grid.
- Footer with quick links.

## User Experience

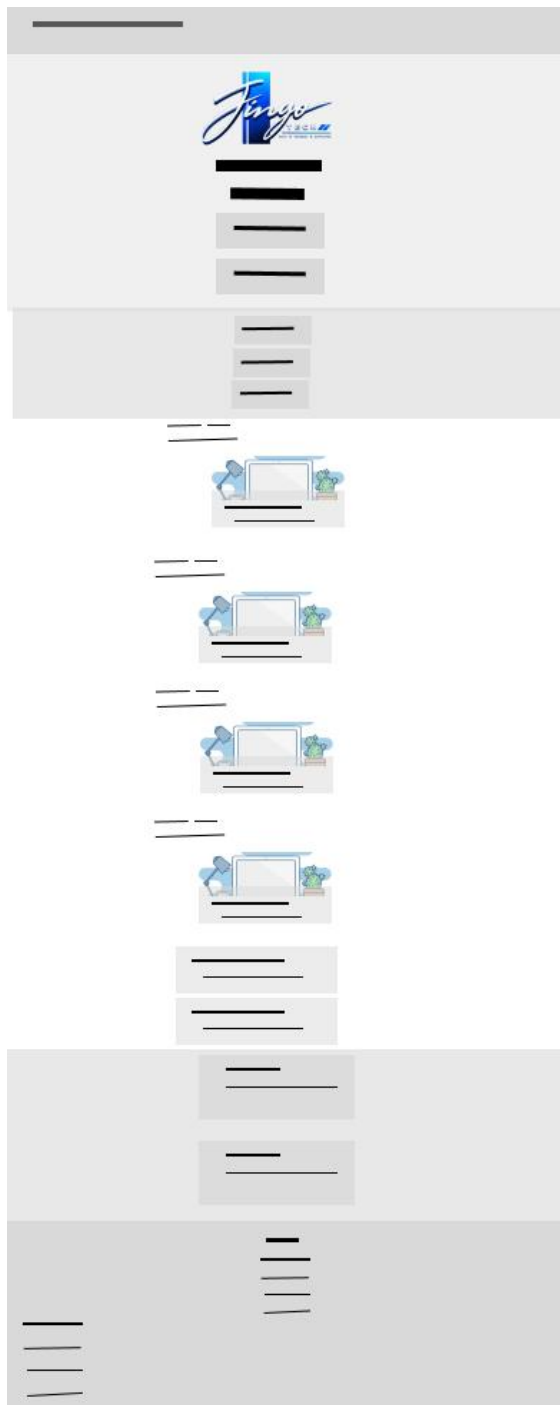

- Fast speeds on slower internet
- Working efficiently on older devices
- Prioritizing mobile design
- Keyboard accessibility
- High colour contrast
- Clear navigation
- Large accessibility friendly buttons
- Simple booking process

## Low Fidelity Wireframes

*Desktop Wireframe:*

## Mobile Wireframe:

## Technical Requirements

### Editor

- Visual Studio Code

### Languages

- HTML
- CSS
- JavaScript

### Version Control

- Git
- GitHub

### Hosting

I will use Github Pages

- Free
- HTML
- CSS
- JavaScript

### Domain

[www.jingotech.co.za](http://www.jingotech.co.za)

### Browser Support

- Chrome
- Edge
- Brave
- Safari
- Firefox

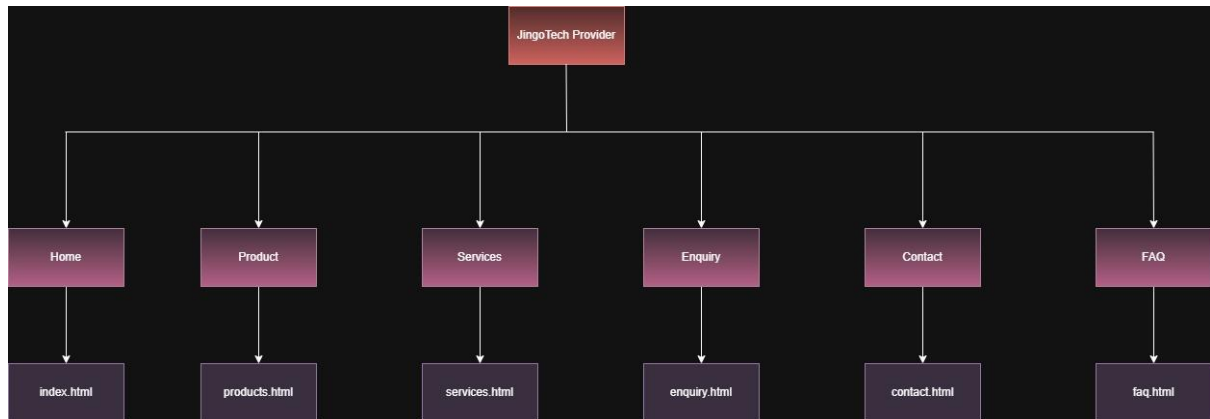

## Timeline

| Dates | Milestone                                                               |
|-------|-------------------------------------------------------------------------|
| 03/08 | Researching the company and define its target audience                  |
| 05/08 | Complete Website Project Proposal                                       |

Help me figure out the best way to do this proposal pdf assignment

Yes. From the screenshots, this is a **Website Project Proposal**. The easiest way to score well is to treat it like you're presenting a real project to a client rather than just answering questions.

#### Step 1: Choose a simple organisation

Pick something that is easy to research.

Some good choices are:

- Local gym
- Clothing store
- Restaurant
- Charity/NGO
- Hair salon
- Computer repair business
- School
- Small online electronics store

If your lecturer allows fictional organisations, create one that's realistic.

#### Recommended document structure

##### Cover Page

- Project Title
- Student Name
- Student Number
- Module
- Lecturer
- Date

##### Table of Contents

Word can generate this automatically.

#### 1. Organisation Overview

Include:

##### Name

Example

TechZone Computer Repairs

##### History

One or two paragraphs.

Example

TechZone Computer Repairs was established in 2020 in Johannesburg. The company specialises in computer repairs, laptop upgrades and IT support for individuals and small businesses.

##### Mission

Example

To provide affordable and reliable computer repair services.

##### Vision

Example

To become one of South Africa's most trusted technology service providers.

##### Target Audience

Example

- Students
- Businesses
- Home users
- Gamers

Explain what the website should achieve.

Example

- Increase online visibility
- Allow customers to book repairs
- Display services
- Collect enquiries
- Improve customer communication

##### KPIs

Include measurable goals.

Example

| KPI                      | Target    |
|--------------------------|-----------|
| Monthly Visitors         | 1000      |
| Contact Form Submissions | 50/month  |
| Bounce Rate              | Below 40% |
| Mobile Users             | 70%       |

#### 3. Current Website Analysis

If no website exists, simply write:

The organisation currently has no official website. Customers rely mainly on Facebook and WhatsApp, limiting the company's online presence.

If there is an existing website:

Strengths

- Easy navigation
- Fast loading

Weaknesses

- Outdated design
- No mobile responsiveness
- Missing contact form
- Poor SEO

#### 4. Proposed Website Features

List every page.

Example

##### Homepage

- Welcome section
- Featured services
- Testimonials

##### About Us

- Company story
- Mission
- Staff

##### Services

- Laptop repairs
- Virus removal
- Networking

##### Contact

- Google Map
- Contact form
- Phone number
- Email

##### Booking

- Online booking form

##### Gallery

- Photos of completed work

##### FAQ

Frequently asked questions.

5. Design and User Experience

Colour Palette

Example:

Primary:

- Blue (#0057B7)

Secondary:

- White (#FFFFFF)

Accent:

- Orange (#F28C2B)

Explain why.

Typography

Example:

Heading:

- Poppins Bold

Body:

- Roboto

Layout

Describe:

- Clean
- Modern
- Responsive
- Easy navigation
- Large buttons

User Experience

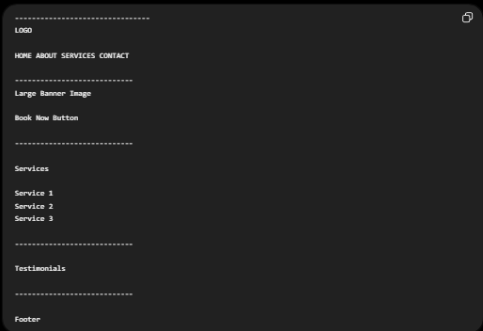

Mention:

- Mobile-friendly
- Fast loading
- Clear menus
- Accessible fonts
- Search function

Low Fidelity Wireframes

Draw simple sketches.

Example:

You can draw them by hand and insert photos or use Word shapes.

6. Technical Requirements

6. Technical Requirements

Mention everything needed.

Hosting

- HostAfrica
- Afrinhost

Domain

Example:

Languages

- HTML5
- CSS3
- JavaScript

Frameworks

Optional:

- Bootstrap
- React

Database

- MySQL

Version Control

- Git
- GitHub

7. Timeline and Milestones

Example:

| Week | Task             |
|------|------------------|
| 1    | Research         |
| 2    | Proposal         |
| 3    | Wireframes       |
| 4    | HTML Structure   |
| 5    | CSS Styling      |
| 6    | JavaScript       |
| 7    | Testing          |
| 8    | Final Submission |

8. Budget

Make it realistic:

| Item        | Cost (R)              |
|-------------|-----------------------|
| Domain      | 200/year              |
| Hosting     | 1500/year             |
| Design      | 6000                  |
| Development | 12000                 |
| Testing     | 2500                  |
| Maintenance | 500/month             |
| Total:      | Approximately R22,200 |

9. References

Use Harvard referencing.

Example:

- WBSchools. 2026. *HTML Tutorial*.
- Mozilla Developer Network. 2026. *HTML Documentation*.
- Nielsen Norman Group. 2026. *UX Design Principles*.
